1. About Sunfund Mobile App

Sunfund Mobile App offers an excellent and consistent experience for stock trading. Investors can be able to view their balance, position, order and trade history in a shortest path. The workflow of researching a stock, adding products to watchlist and placing orders are intuitive without being overwhelming. This manual is a guideline for users to manage their trading account and placing orders.

2. User Login

This mobile app supports 2- factor authentication, email and SMS security login. Beside the Username and Password, user request to input the one time password, software token or use mobile's biometric authentication to feed the token to login.

Login Flow Terms Explanation:

Terms	Explanation
Username	User login account name
Password	User login password
Secure PIN	App local secure PIN set up for mobile device verification locally
One-time verification code(OTP)	A one time verification code which receive from user SMS/Email for software token registration or 2nd login in SMS/Email login flow
security one time verification code (SOTP)	A one time verification code which generate from software token registered device for 2FA login
Two factor authentication (2FA)	Two-factor authentication is an extra layer of security for user stock account. HKEX trade is only accept SOTP for 2FA.

2.1 Software Token Authentication

2.1.1 Enable Software Token For Two-Factor Authentication Security

Input the password of Software Token Generation tools and user can also enable the biometric authentication to eliminate the input of this password and token during login process in future.

Cancel Confirm Buy

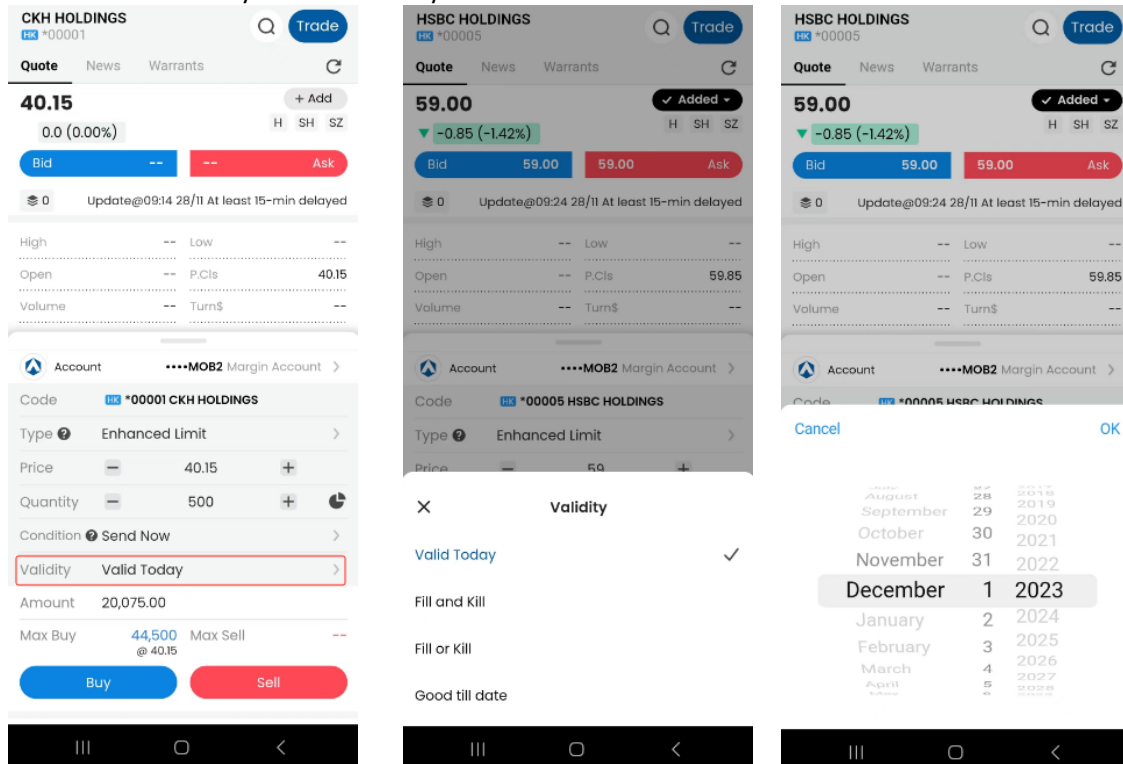

Similarly, press “Sell”, then “Confirm” to send out the sell order.

3.1 Good Till Date Order

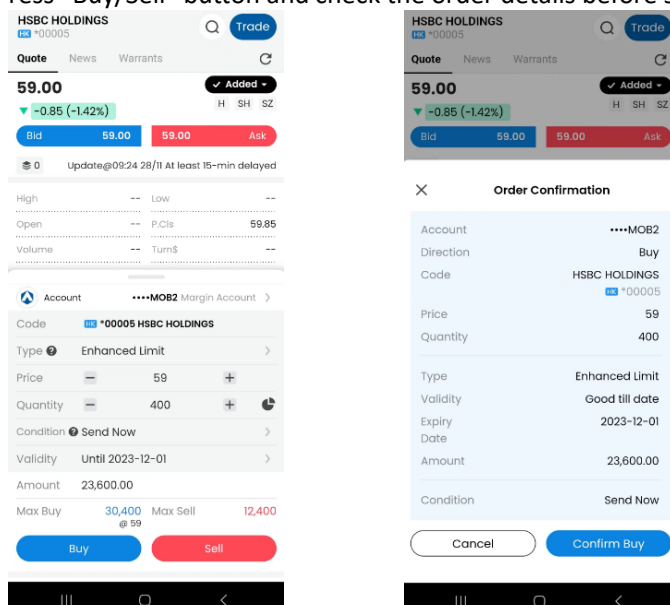

Press on “Valid Today” to modify the order date.

Once the user chooses the “Good Till Date”, select the order date.

For example, today is 6 Jun, you can send out a “Good Till Date Order” which can extend the Order Expiry Date to 8 Jun. If the order cannot be executed, it will be stored in the server and will be placed in the market on every consecutive day until the end of 16 Nov or be executed.

Press “Buy/Sell” button and check the order details before sending out the order.

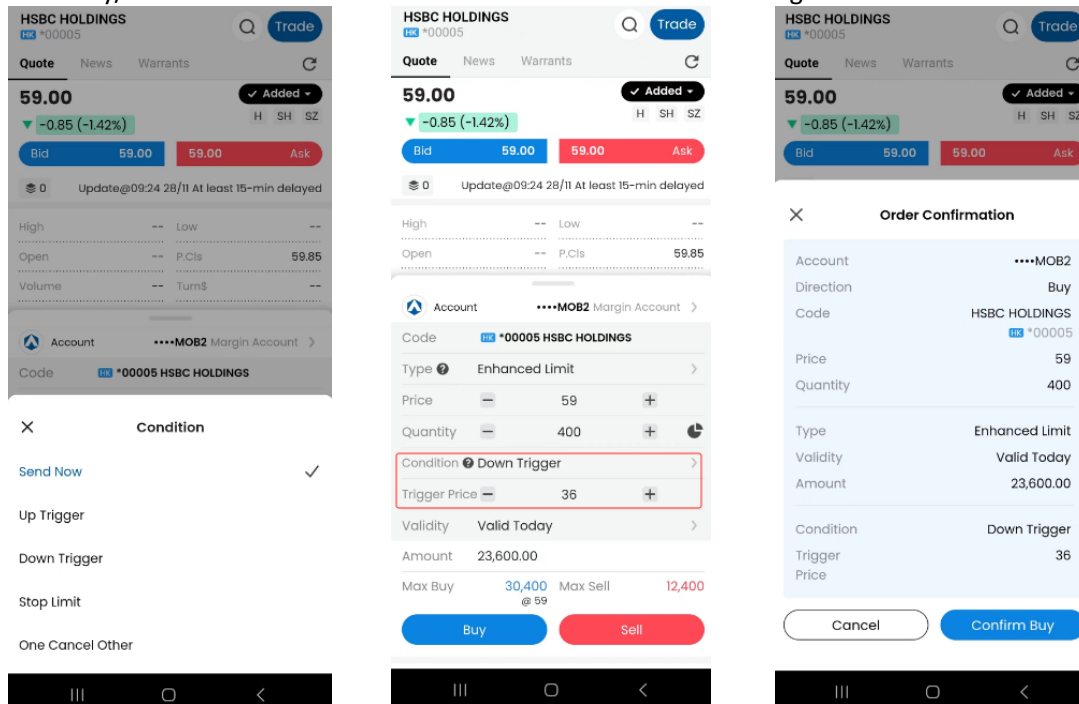

3.2 Conditional Order

Press the “Condition” button and select the condition order type.

Default is “Send Now”. The users can select “Up Trigger”, “Down Trigger”, “Stop Limit” or “One Cancel Other” according to their order preference.

Input the Trigger Price and then press OK.

Press “Buy/Sell” button and check the confirmation box before sending out the order.

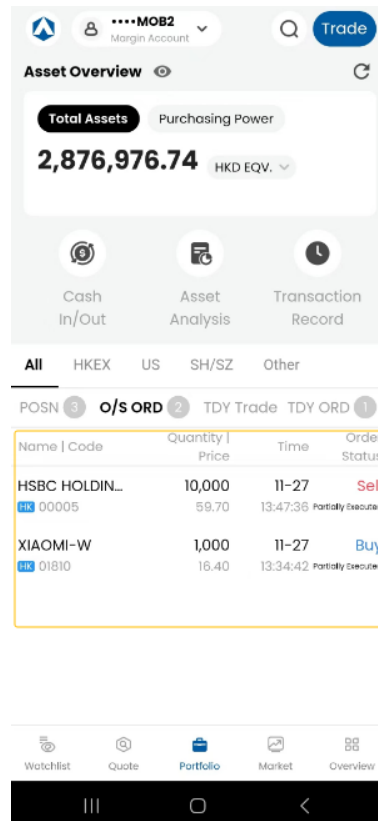

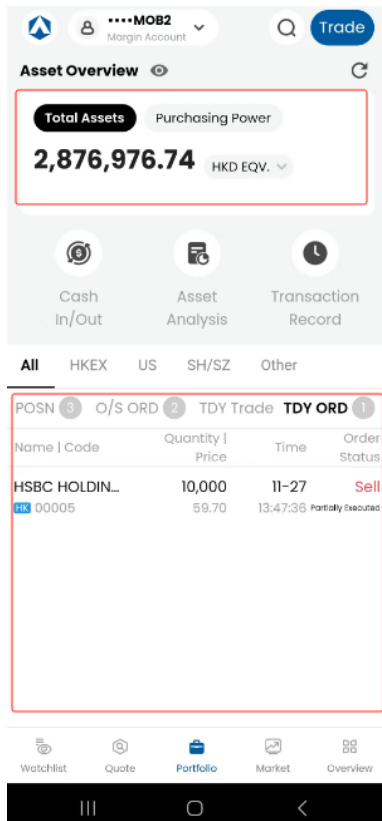

Button should be Buy/Sell, Confirm Buy (change screen cap)

3.3 Check Outstanding Order and Settled Order

The account profile will be displayed on the top (Red Circle).

All orders placed of the day will be displayed on the Today's Order page (Blue Circle) under profile.

All outstanding orders in the market will be displayed on O/S Order page (Yellow Circle) under profile.

Press on the order to Update / Cancel the order.

Press "Cancel Order" to Cancel order.

Press "Change Order" to Update order.

3.4 Check Portfolio

Show Client's holding products and funds.

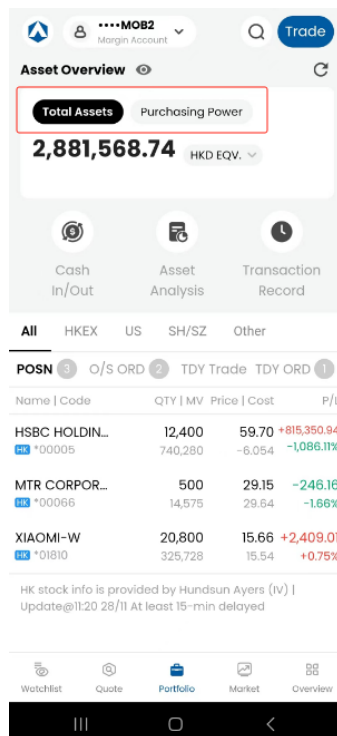

Total Asset = Total Cash + Total Product Market Value

Purchasing Power = Avail. Purchase

The portfolio is default showing the HKD Equivalent

By default, those figures are hidden to avoid peeping in public area. User can press the “Eye”  button to unhide them.

Portfolio: Show all the stocks held by the client and their price market value

4. WatchList

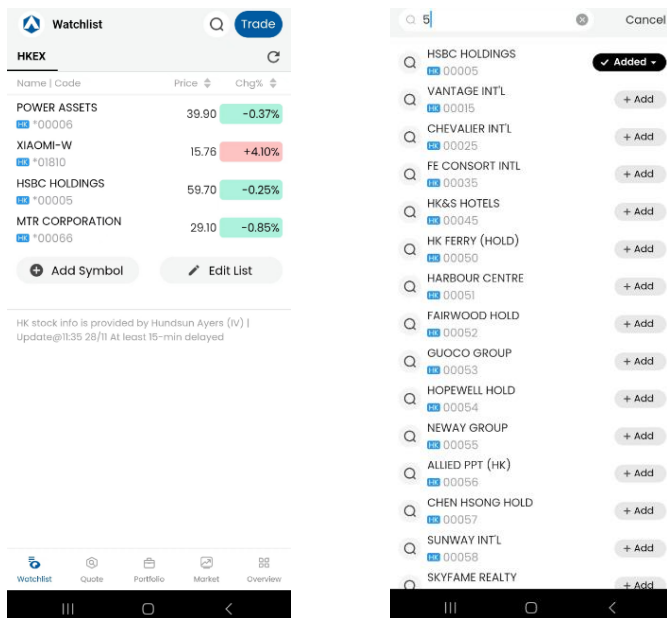

Watchlist allow user to add their favorite products to the list which make them easier to monitor the product's status.

Select the Watchlist icon  at the quick access bar at the bottom.

Press  can initiate the search function for getting the target stock.

Press  button of the target stock.

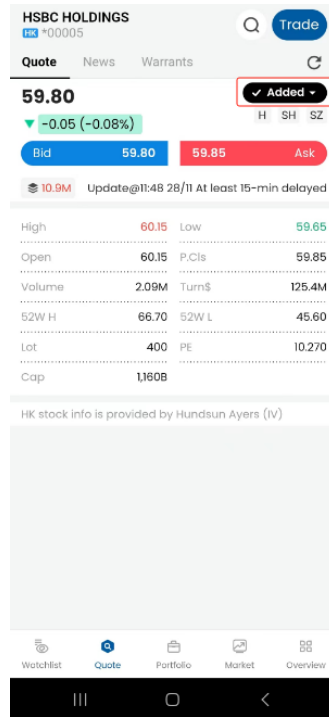

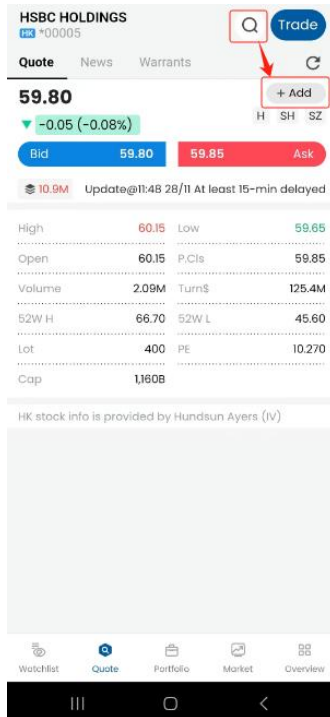

The Watchlist can maximum save 20 products per list, but user can create more than one watch list per market.

When the Watchlist is full, it prompt "This group is full" next to the name of Watchlist.

Or user can use  to search the product to get the stock at quote page.

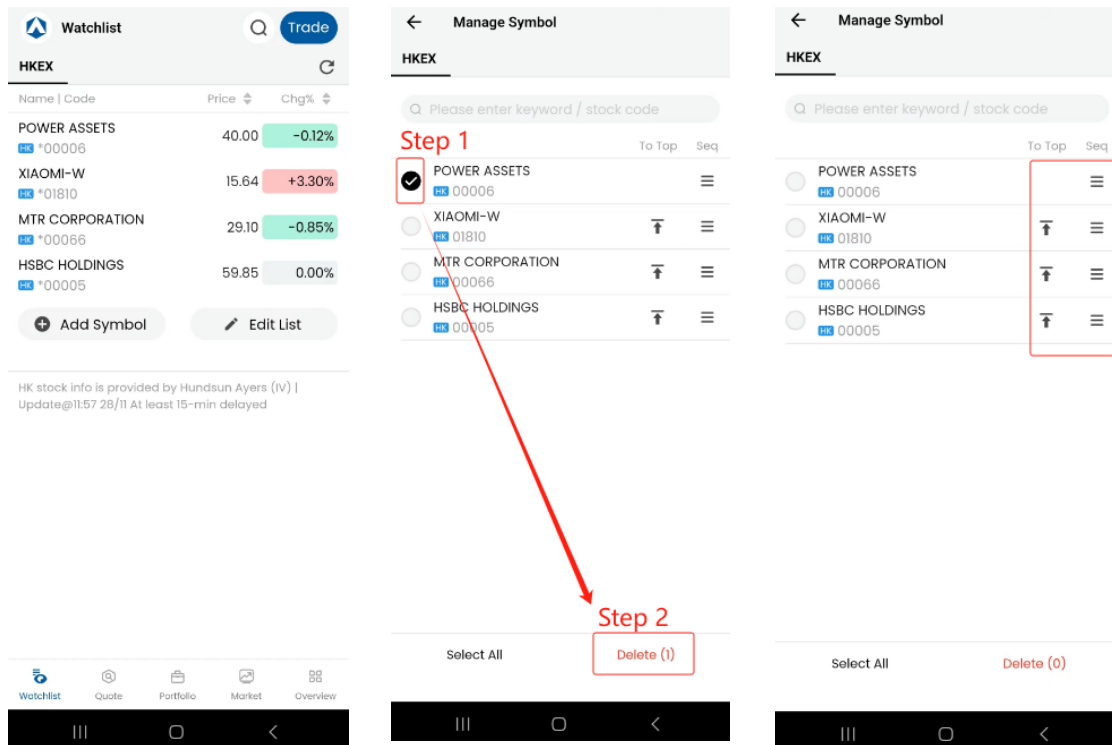

Press  for adding the product to your watch list whenever you want.

When viewing the stock and see the button . It means it has added to the Watchlist. If user want to remove the stock from Watchlist, he can press the button and confirm at the bottom dialogue.

In additions, user can find the similar button in the stock search screen. Press  button can also remove the stock.

Press  at the button right of the Watchlist, user can add and delete the products in the list.
In additions, he can move stock and arrange the sequence of the stocks to be displayed in the list.

Watchlist is just a starting point. When user click on a stock, he can browse its quote & detail quote (according to the IV service subscribed), news, warrants, related stocks and company information.

5. Quote

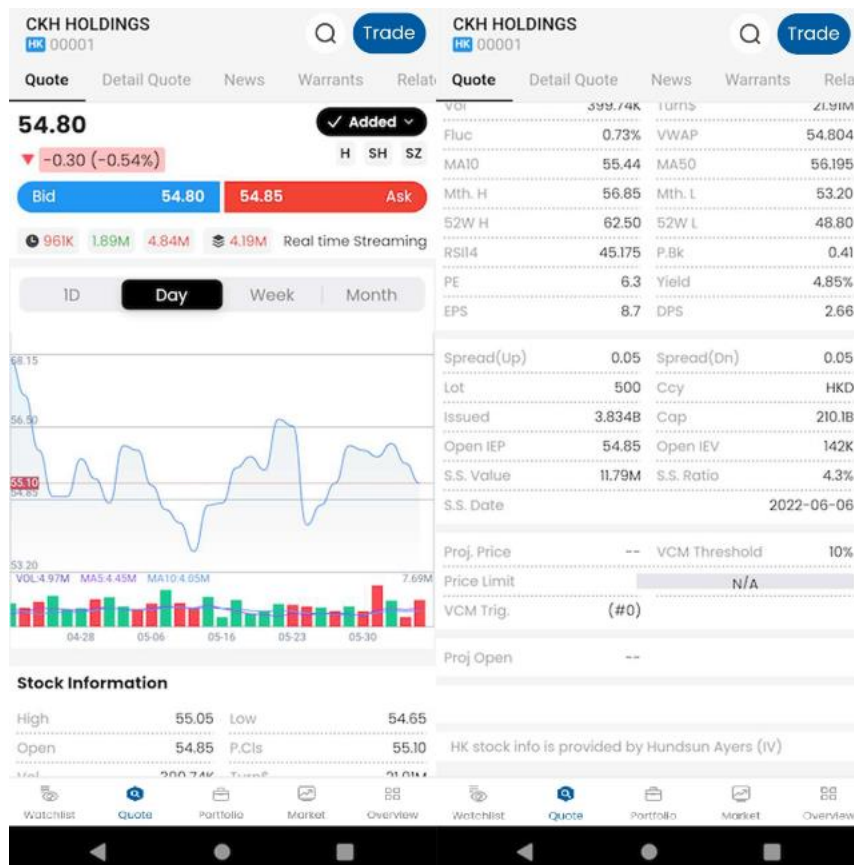

Press on the product, the product prices will be displayed. The content varies depending on the IV services subscribed.

5.1 HKEX Price Quote

Scroll up/down to view the details of stock like stock price, fund flow, chart, history data (1M, 52wk High/Low), technical indicators (MA10, RSI), P/E and Mkt. Cap etc. At bottom, there shows the POS/CAS/VCM information.

HKEX stock quote info is provided by Hundsun Ayers (IV)

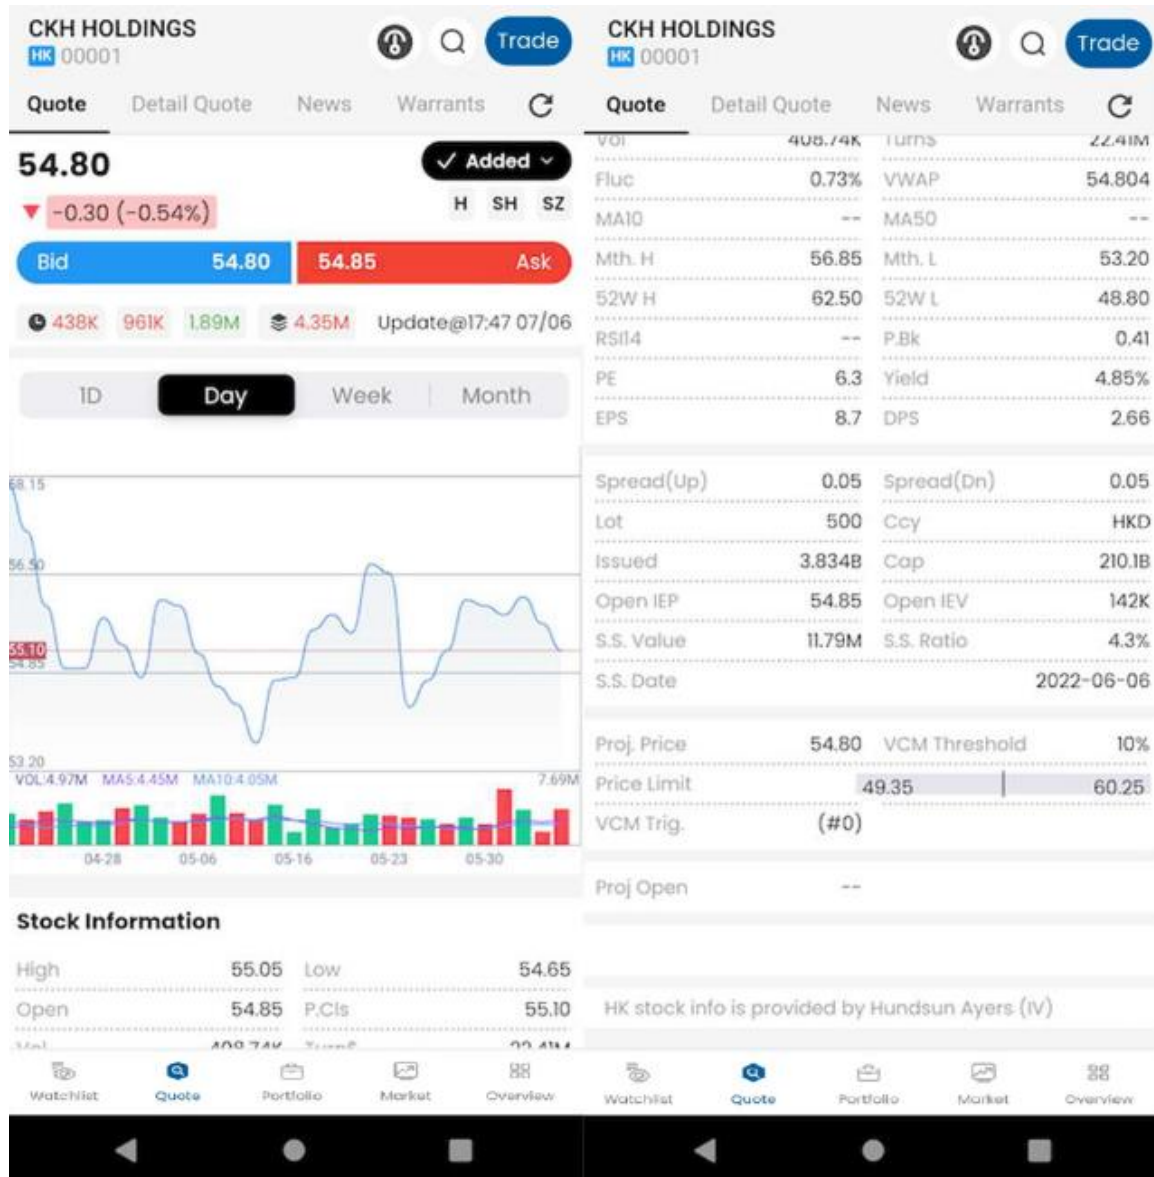

3 types of HK stock quotes are supported: **Real time streaming quote**, **Real time snap shot quote**, and **Delay quote**

Real time streaming quote: user receive real time quote data continuously and keep update display automatically when quote update during market hours

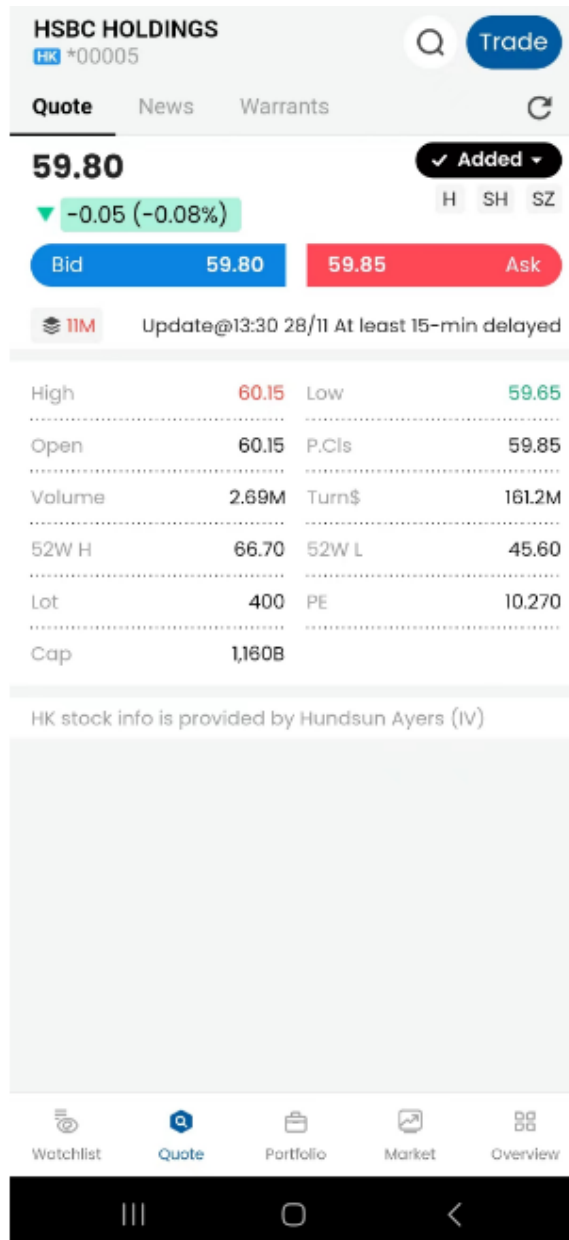

Real time streaming quote tabs list:

Quote, Detail Quote, News, Warrants, Related, Company

Real time snap shot quote: user receive real time quote data in “Once” by user request and no data update before next quote request

Real time snap shot quote tabs list:
 Quote, Detail Quote, News, Warrants, Related

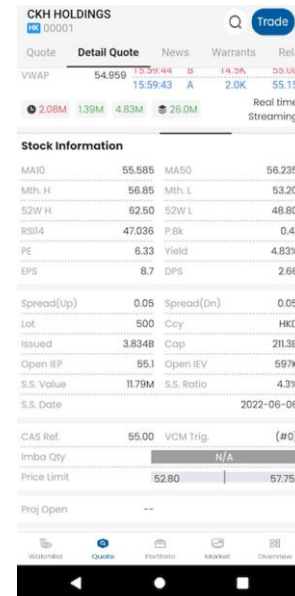

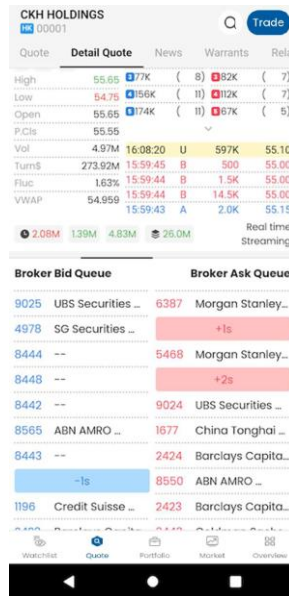

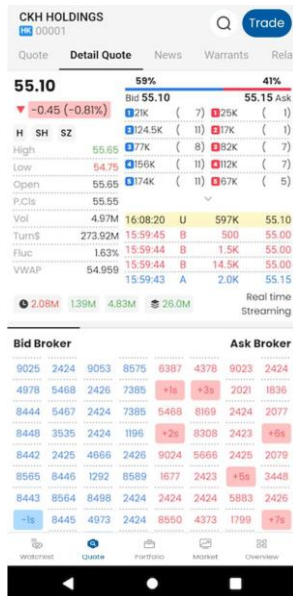

Delay quote: user receive at least 15 minutes delayed free quote data in “Once” by user request and no data update before next quote request

Delay quote tabs list:
 Quote, News, Warrants
